REVIEWS

– How well did the AI capture your skills and experience from your CV?

A - The AI captured my Resume in a simpler and more professional format.

– What changes did you have to make manually, and what does that reveal about prompt quality?

A - I had to amend my contact details. This reveals that the prompt quality was mostly good, but required slight correction for accuracy in personal information.

– How would you use a portfolio like this in a job application?

A - I would add my portfolio link to my resume when applying for jobs to showcase my skills and projects.

– What would you add or improve if you had more time?

A - I would improve my LinkedIn profile and add my other portfolio to it, which is still a work in progress.
